

Value of Education

There are many values and Advantages to having an education. You will have a successful future and would be able to do anything you want. Then you would have any job you want and then you would have good income, believe me. You need an education now more than ever. It used to be back in the old days you didn't need an education like you do now. To do anything now you have at least a high school diploma, even with that you can't do much. Because now were going through hard time I believe so any way. Because if you become a dropout you would be more than likely getting paid minimum wage at McDonalds. Most high school dropouts become substances abuser with proven facts. And if you even have a job being paid minimum wage you would struggle throughout your life.

Most especially if you were a substance abuser you would be thinning, and wasting all your money on that drug or substance. Soon enough you would become a thane thieving for drugs and you become homeless more than likely and soon enough, sleeping in the streets. Unaware of what might be lurking in the streets. There is nothing you can do to stop it, like getting in gun fire gang related business you have no clue. It's a big scary world out there. You would more in likely sad and unhappy of your life and depressed. You would regret life I know from experienced family members that dropout. You would be wishing you would have stayed in school. I know school can boring at times. It is to me anyway. School can be very boring I know it is most of the time. Sometimes you may think it is a waste of time," I think that sometimes", I know it's not; but it sure does feel like it.

To live fairly you need at least a high school diploma to get a job. And if you go to college you can even become rich depending on what job you want and go for it can be very difficult to but worth it in the end. Take one step at a time now don't rush through any type of education program.
